

2
3 HOUSE TRANSPORTATION COMMITTEE SUBSTITUTE FOR HB81
4

5
6
7
8 SYNOPSIS: Current law provides for size and weight
9 restrictions on certain vehicles operating in
10 Alabama.

11 This bill would allow motor vehicle weight
12 increases for vehicles that have conversion
13 equipment installed allowing the vehicle to operate
14 on compressed natural gas or compressed liquefied
15 gas.

16
17 A BILL
18 TO BE ENTITLED
19 AN ACT
20

21 To amend Section 32-9-20, Code of Alabama 1975, as
22 last amended by Act 2016-190, 2016 Regular Session, relating
23 to weight restrictions on the operation of certain motor
24 vehicles; to allow for weight increases for vehicles having
25 conversion equipment installed that allows the vehicle to
26 operate on compressed natural gas or compressed liquefied gas.
27 BE IT ENACTED BY THE LEGISLATURE OF ALABAMA:

1 Section 1. Section 32-9-20, Code of Alabama 1975, as
2 last amended by Act 2016-190, 2016 Regular Session, is amended
3 to read as follows:

4 "§32-9-20.

5 "(a) It shall be unlawful for any person to drive or
6 move on any highway in this state any vehicle or vehicles of a
7 size or weight except in accordance with the following:

8 "(1) WIDTH. Vehicles and combinations of vehicles,
9 operating on highways with traffic lanes 12 feet or more in
10 width, shall not exceed a total outside width, including any
11 load thereon, of 102 inches, exclusive of mirrors or other
12 safety devices approved by the State Transportation
13 Department. The Director of the State Transportation
14 Department may, in his or her discretion, designate other
15 public highways for use by vehicles and loads with total
16 outside widths not exceeding 102 inches, otherwise; vehicles
17 and combinations of vehicles, operating on highways with
18 traffic lanes less than 12 feet in width, shall not exceed a
19 total outside width, including any load thereon, of 96 inches,
20 exclusive of mirrors or other safety devices approved by the
21 State Transportation Department. No passenger vehicle shall
22 carry any load extending beyond the line of the fenders. No
23 vehicle hauling forest products or culvert pipe on any highway
24 in this state shall have a load exceeding 102 inches in width.

25 "(2) HEIGHT. No vehicle or semitrailer or trailer
26 shall exceed in height 13 1/2 feet, including load.

1 "(3) LENGTH. No vehicle shall exceed in length 40
2 feet; except, that the length of a truck-semitrailer
3 combination, semitrailers, including load, used in a truck
4 tractor-semitrailer combination, shall not exceed 57 feet;
5 semitrailers and trailers, including load, used in a truck
6 tractor-semitrailer-trailer combination, shall not exceed 28
7 1/2 feet each; and motor vehicles designed, used, or
8 maintained primarily as a mobile dwelling, office, or
9 commercial space, commonly called motor homes, shall not
10 exceed 45 feet. Semitrailers exceeding 53 1/2 feet shall only
11 be operated on highways designated pursuant to Section 32-9-1
12 and shall only be operated when the distance between the
13 kingpin of the semitrailer and the rearmost axle or a point
14 midway between the two rear axles, if the two rear axles are
15 tandem axles, does not exceed 41 feet and if the semitrailer
16 is equipped with a rear underride guard of a substantial
17 construction consisting of a continuous lateral beam extending
18 to within four inches of the lateral extremities of the
19 semitrailer and located not more than 22 inches from the
20 surface as measured with the semitrailers empty and on a level
21 surface. For purposes of enforcement of this subdivision,
22 lengths of semitrailers and trailers refer to the cargo
23 carrying portion of the unit. Truck tractor units used
24 exclusively in combinations transporting motor vehicles may
25 directly carry a portion of the cargo, provided that the
26 combinations are restricted to truck tractor-semitrailer
27 combinations only and provided further that the overall length

1 of these particular combinations shall not exceed 65 feet;
2 except that the overall length of stinger-steered type units
3 shall not exceed 75 feet. No truck tractor-semitrailer
4 combination used exclusively for transporting motor vehicles
5 shall carry any load extending more than three feet beyond the
6 front or four feet beyond the rear of the combination. No
7 other vehicle operated on a highway shall carry any load
8 extending more than a total of five feet beyond both the front
9 and rear, inclusive, of the vehicle.

10 "(4) WEIGHT.

11 "a. The gross weight imposed on the highway by the
12 wheels of any one axle of a vehicle shall not exceed 20,000
13 pounds, or such other weight, if any, as may be permitted by
14 federal law to keep the state from losing federal funds;
15 provided, that inadequate bridges shall be posted to define
16 load limits.

17 "b. For the purpose of this section, an axle load
18 shall be defined as the total load transmitted to the road by
19 all wheels whose centers are included between two parallel
20 transverse vertical planes 40 inches apart, extending across
21 the full width of the vehicle.

22 "c. Subject to the limit upon the weight imposed
23 upon the highway through any one axle as set forth herein, the
24 total weight with load imposed upon the highway by all the
25 axles of a vehicle or combination of vehicles shall not exceed
26 the gross weight given for the respective distances between
27 the first and last axle of the vehicle or combination of vehi-

1	19	50,000	54,500	60,000	60,000

6 "Except as provided by special permits, no vehicle
7 or combination of vehicles exceeding the gross weights
8 specified above shall be permitted to travel on the public
9 highways within the State of Alabama.

10 "No vehicle or combination of vehicles shall be per-
11 mitted to operate on any portion of the Interstate Highway
12 System of Alabama that shall have a greater weight than 20,000
13 pounds carried on any one axle, including all enforcement tol-
14 erances, or with a tandem axle weight in excess of 34,000
15 pounds, including all enforcement tolerances, or with an over-
16 all gross weight on a group of two or more consecutive axles
17 produced by application of the following formula:

$$W=500 \quad LN \quad + \quad 12N \quad + \quad 36$$

$$N-1$$

20 where W = overall gross weight on any group of two
21 or more consecutive axles to the nearest 500 pounds, L =
22 distance in feet between the extreme of any group of two or

1 more consecutive axles, and N = number of axles in group under
2 consideration; except, that two consecutive sets of tandem
3 axles may carry a gross load of 34,000 pounds each, provided
4 the overall distance between the first and last axles of the
5 consecutive sets of tandem axles is 36 feet or more; provided,
6 that the overall gross weight may not exceed 80,000 pounds,
7 including all enforcement tolerances. Nothing in this section
8 shall be construed as permitting size or weight limits on the
9 National System of Interstate and Defense Highways in this
10 state in excess of those permitted under 23 U.S.C. Section
11 127. If the federal government prescribes or adopts vehicle
12 size or weight limits greater than or less than those now
13 prescribed by 23 U.S.C. Section 127 for the National System of
14 Interstate and Defense Highways, the increased or decreased
15 limits shall become effective on the National System of
16 Interstate and Defense Highways in this state. Nothing in this
17 section shall be construed to deny the operation of any
18 vehicle or combination of vehicles that could be lawfully
19 operated upon the highways and roads of this state on January
20 4, 1975.

21 "d. For purposes of enforcement of this subdivision,
22 all weights less than or equal to the sum of the weight
23 otherwise prescribed by this subdivision, plus an additional
24 weight to be calculated by multiplying the weight prescribed
25 by this subdivision by one-tenth (.10) that shall represent a
26 scale or enforcement tolerance, shall be deemed to be in
27 compliance with the requirements of this section, and shall

1 not constitute violations thereof. No evidence shall be
2 admitted into evidence or considered by the trier of fact in
3 any civil action unless the evidence proffered would tend to
4 prove that the weight of the vehicle exceeded the amount
5 provided in this subsection. Nothing in this paragraph d.
6 shall restrict or affect the right of any defendant to place
7 in evidence such evidence tending to prove the defendant was
8 in compliance with this section.

9 "e. Dump trucks, dump trailers, concrete mixing
10 trucks, fuel oil, gasoline trucks, and trucks designated and
11 constructed for special type work or use shall not be made to
12 conform to the axle spacing requirements of paragraph (4)c of
13 this section; provided, that the vehicle shall be limited to a
14 weight of 20,000 pounds per axle plus scale tolerances; and,
15 provided further, that the maximum gross weight of the
16 vehicles shall not exceed the maximum weight allowed by this
17 section for the appropriate number of axles, irrespective of
18 the distance between axles, plus allowable scale tolerances.
19 All axles shall be brake equipped. Trucks delivering asphalt
20 plant mix which do not exceed the maximum allowable gross
21 weight and operate within 50 miles of their home base shall
22 not be required to conform to the requirements of paragraph
23 (4)a of this section. Concrete mixing trucks which operate
24 within 50 miles of their home base and do not exceed the
25 maximum allowable gross weight shall not be required to
26 conform to the requirements of paragraph (4)a of this section.
27 It shall be a violation if the vehicles named under this

1 subdivision travel upon bridges designated and posted by the
2 Transportation Director as incapable of carrying the load.

3 "f. If the driver of any vehicle can comply with the
4 weight requirements of this section by shifting or equalizing
5 the load on all wheels or axles and does so when requested by
6 the proper authority, the driver shall not be held to be
7 operating in violation of this section.

8 "g. When portable scales are used in the enforcement
9 of this section, the axles of any vehicle described or
10 commonly referred to as tandem or triaxle rigs or units (that
11 is, vehicles having two or more axles in addition to a
12 steering axle), the group of tandem or triaxles shall be
13 weighed simultaneously, and the total weight so derived shall
14 be divided by the number of axles weighed in the group to
15 arrive at the per axle weight, except that if any one axle in
16 the group exceeds 20,000 pounds in weight, it shall not exceed
17 the weight of any other axle in the group by more than 50
18 percent. When portable scales are used to determine the weight
19 of a vehicle pursuant to this section, the operator of the
20 vehicle will be permitted to move the vehicle to the nearest
21 platform scales certified by the Department of Agriculture and
22 Industries and operated by a bonded operator within a distance
23 of 10 highway miles, accompanied by an enforcement officer to
24 verify the accuracy of the portable scales used in determining
25 the vehicle weight. If the weight of the vehicle is shown by
26 the platform scales to be within the legal limits of this

1 section, the operator of the vehicle shall not be held to be
2 in violation of this section.

3 "h. The governing body of a county, by appropriate
4 resolution, may authorize limitations less than those
5 prescribed herein for vehicles operated upon the county
6 highways of the county.

7 "i. The State Transportation Department may post or
8 limit any road or bridge to weights less than those prescribed
9 by this section. It is the legislative intent and purpose that
10 this section be rigidly enforced by the State Transportation
11 Department, the Alabama State Law Enforcement Agency and any
12 other authorized law enforcement officers of the state, any
13 county, or city and incorporated towns.

14 "j. Two and three axle vehicles being used
15 exclusively for the purpose of transporting agricultural
16 commodities or products to and from a farm and for
17 agricultural purposes relating to the operation and
18 maintenance of a farm by any farmer, custom harvester or
19 husbandman may not be made to conform to the axle requirements
20 of paragraph (4)a of this section or the gross weight
21 requirements of paragraph (4)c of this section.

22 "(b) (1) Any vehicle utilizing an auxiliary power or
23 idle reduction technology unit in order to promote reduction
24 of fuel use and emissions because of engine idling shall be
25 allowed an additional 400 pounds total to the gross, axle,
26 tandem, or bridge formula weight limits defined in this
27 section.

1 "(2) To be eligible for the exception provided in
2 this subsection, the operator of the vehicle must provide
3 written proof or certification of the weight of the auxiliary
4 power unit (APU) and demonstrate or certify the idle reduction
5 technology is fully functional at all times.

6 "(3) Written proof or certification of the weight of
7 the APU must be available to law enforcement officers if the
8 vehicle is found in violation of applicable weight laws. The
9 weight allowed cannot exceed 400 pounds or the actual weight
10 proven or certified, whichever is less.

11 "(4) It is the intent of this subsection to apply at
12 the state highway level the weight limit increase for vehicles
13 using a functioning auxiliary power or idle reduction
14 technology as provided in the Federal Energy Policy Act of
15 2005.

16 "(c) (1) Any vehicle operating on federal interstate
17 highways which operates primarily on compressed natural gas or
18 liquefied natural gas shall be allowed up to an additional
19 2,000 pounds in accordance with 23 U.S.C. Section 127(s), to
20 the gross, axle, tandem, or bridge formula weight limits
21 provided in this section.

22 "(2) To be eligible for the extra weight allowance
23 provided in this subsection, the operator of the vehicle must
24 provide written proof or certification that the vehicle has an
25 EPA certified natural gas engine or an EPA approved conversion
26 unit installed on the vehicle which allows the vehicle to

1 operate primarily on compressed natural gas or liquefied
2 natural gas and that the vehicle operates on such fuel.

3 "(3) This subsection shall apply on federal
4 interstate highways to the weight limit increases for vehicles
5 using an EPA certified natural gas engine or an EPA approved
6 conversion unit installed on the vehicle which allows the
7 vehicle to operate primarily on compressed natural gas or
8 liquefied natural gas.

9 "(4) The vehicle weight limit exception provided by
10 23 U.S.C. §127(s) is allowed only on federal interstate
11 highways."

12 Section 2. This act shall become effective on the
13 first day of the third month following its passage and
14 approval by the Governor, or its otherwise becoming law.
