8 SYNOPSIS: Under existing law, the dispensing of a
9 different drug or brand of a drug in lieu of the
10 drug ordered or prescribed is prohibited except a
11 pharmacist is authorized to dispense a less
12 expensive pharmaceutically and therapeutically
13 equivalent generic drug product prescribed by a
14 licensed physician or other practitioner, including
15 a practitioner located in another state. A written
16 prescription issued in this state is required to
17 have two signature lines, one designated "dispense
18 as written" and one designated "product selection
19 permitted." An oral prescription from a
20 practitioner is required to specify whether a
21 generic drug product may be dispensed. A violation
22 is subject to a fine.

23 This bill would delete the provision
24 prohibiting dispensing a different drug or brand of
25 drug and would specify that unless the physician or
26 other practitioner indicates otherwise, a
27 pharmacist may dispense either a brand name drug or

1 a less expensive pharmaceutically or
2 therapeutically equivalent generic drug product.
3 The bill would also delete the requirement for a
4 written prescription to contain two signature lines
5 and the specified requirement for an oral
6 prescription.
